Speaker

Kristen Luttenberger, MSN, RN, CCRN-CMC, PCCN, APN-C

Kristen's professional experience includes working as an RN for nearly 25 years in the pediatrics, medical-surgical, telemetry, intensive and coronary care areas. She has served as a nurse educator for her entire career, currently works as a full-time cardiac nurse practitioner and has also been a collegiate adjunct professor. Kristen is currently triple certified with critical care clinical certifications, along with her nurse practitioner license, and prides herself in working with critical care and progressive care nurses at the bedside and sitting for those certification exams every 3 years.

*For complete biography, please visit MedEdSeminars.net
MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

Course Overview

This two-day course provides the critical care nurse with a review of AACN's 2020 core curriculum. The agenda combines central knowledge-based lectures for nurses working in the ICU with an essential review of nursing care and interventions according to the AACN exam blueprint for the critical care provider. This review is not an introduction to the environment of the ICU, but a comprehensive update for the professional already in practice at the bedside and preparing for the certification examination.

For attendees preparing to take the CCRN Exam: This review course content follows AACN's updated 2020 CCRN Exam blueprint. Professional Caring and Ethical Practice (20% of exam) issues are addressed when appropriate throughout.

Program Learning Outcomes

This program prepares the learner to:

- Discuss and practice test-taking skills.
- Review critical anatomy, physiology and pathophysiology of each system.
- Discuss significant assessment and diagnostic findings relevant to the critical care environment.
- Discuss clinical presentation as well as specific patient management of commonly seen critical care conditions.
