Speaker

Melissa Allen, MSN, NNP-BC, FNP-C, RNC-OB, RNC-MNN, C-EFM

Melissa has a combined 30 years of clinical and instructional experience in all areas of maternal-neonatal nursing. She received her BSN from the University of Alabama in Huntsville, her MSN from the State University of New York at Stony Brook and a post-master's certificate as a family nurse practitioner from Middle Tennessee State University in Murfreesboro.

She has held faculty positions at Motlow State Community College and Vanderbilt University School of Nursing, teaching maternal-child nursing in the classroom and clinical setting. She now practices as a neonatal nurse practitioner (NNP) for Children's Hospital and Clinics in Minneapolis, MN. She has traveled extensively as an advanced practice nurse and has had the opportunity to work in a variety of maternal-infant environments.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

Course Overview

Presented in lecture format, this course reviews topics for the Maternal Newborn Nursing Exam by the National Certification Corporation (NCC). Elements of the examination are discussed, followed by a review of the content. The major components include disease processes during pregnancy, maternal and fetal complications, postpartum and neonatal assessments. Practice questions are integrated throughout the presentation.

Program Learning Outcomes

This program prepares the learner to:

- Describe the Maternal Newborn Nursing Exam, test plan and the practice requirements to sit for the exam.
- Construct a study plan for the exam based on understanding the blueprint and domains of practice covered.
- Identify common mistakes and pitfalls that are made during studying and testing for the exam.
- Recall the core components covered in the exam through didactic supplementation and test questions.
