## Speaker

### Michael Nanney, BSN, RN, RRT, CPAN, CCRN

Michael has nearly 30 years of experience in the medical profession, beginning as a registered respiratory therapist. He has practiced in various intensive care units as an RRT, where his duties included ventilator management, airway management and hemodynamic monitoring. In 1993, after graduating from nursing school, he began working in a cardiac cath lab/ electrophysiology lab, where he worked in a dual role as registered nurse and respiratory therapist. In his career, he has worked in various ICUs as a bedside nurse and a rapid response nurse.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

## Course Overview

This two-day course provides the critical care nurse with a review of AACN's 2020 core curriculum. The agenda combines central knowledge-based lectures for nurses working in the ICU with an essential review of nursing care and interventions according to the AACN exam blueprint for the critical care provider. This review is not an introduction to the environment of the ICU, but a comprehensive update for the professional already in practice at the bedside and preparing for the certification examination.

For attendees preparing to take the CCRN Exam:  
This review course content follows AACN's updated 2020 CCRN Exam blueprint. Professional Caring and Ethical Practice (20% of exam) issues are addressed when appropriate throughout.

### Program Learning Outcomes

This program prepares the learner to:

- Discuss and practice test-taking skills.
- Review critical anatomy, physiology and pathophysiology of each system.
- Discuss significant assessment and diagnostic findings relevant to the critical care environment.
- Discuss clinical presentation as well as specific patient management of commonly seen critical care conditions.

## Registration Information
