Speaker

Alex Klacman, PhD(c), MSN/Ed., RN-BC, CCRN

Alex currently works as the system education specialist for critical care for the Texas Health Resources healthcare system and as educator for the critical care and cardiac services at Texas Health Presbyterian Hospital Dallas. She is an experienced critical care nurse, having practiced at the bedside for eight years prior to moving into her role as educator.

She was the first person globally to lead the implementation of the American Heart Association's innovative Resuscitation Quality Improvement (RQI®) program. Her interests include best practices in resuscitation education and innovation, care of critically ill cardiology patients and basic/advanced ECG interpretation.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

Course Overview

The purpose of this course is to provide the critical care nurse with the knowledge and tools to be able to provide evidence-based care to critically ill patients with some of the most common diagnoses seen in the ICU setting, including diabetes/DKA, heart failure/cardiogenic shock, sepsis and acute stroke.

Program Learning Outcomes

This program prepares the learner to:

- Understand the most current evidence-based treatment guidelines for the care of commonly seen conditions in the ICU, including diabetes/DKA, heart failure/cardiogenic shock, sepsis and acute stroke.
