Speaker

Cammy Christie, MSN, APRN, CCRN-CMC-CSC, PCCN

Cammy is an internationally known speaker with over 45 years of critical care experience. She has taught the CCRN® Exam Review as well as critical care updates with an emphasis on the critical thinking skills of the bedside practitioner. In addition to lecturing across the globe, Cammy is a reviewer for several revered nursing journals, has numerous publications in the area of critical care and continues to have an active practice as an acute care nurse practitioner at the University of Florida, Division of Critical Care Medicine, Cardiothoracic Surgery. As a critical care nurse practitioner, Cammy brings many clinical practice skills to her lectures as well as providing clinical pearls for bedside care.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.

Course Overview

The purpose of this program is to provide a basic overview of common complications encountered in the critical care environment. We will discuss clinical assessment findings, as well as various etiologies that contribute to these conditions. This course will discuss the spectrum of chest pain, causes and treatment. We will provide an in-depth review of Acute Coronary Syndromes, recognition of ischemia vs. infarction, as well as treatment modalities for each. We will also review the various types of heart failure, differentiating between systolic and diastolic dysfunction, as well as treatment recommendations. As the number of patients diagnosed with heart failure continues to rise, we will also see an increase in comorbidities with our patients. Increased recognition and awareness of the pathophysiological processes are essential in providing safe, comprehensive care in today's healthcare environment.

This course will also discuss pulmonary assessment skills, as well as a thorough review of arterial blood gas analysis and interpretation. Renal failure will also be reviewed; discussing the incidence and causes of both acute and chronic renal failure. We will end the course with a review of current data related to patients with sepsis—recognizing the signs and discussing Early Goal Directed therapy. Emphasis will be placed on early recognition and initiation of recommended protocols to improve patient outcomes

Agenda

Critical Care Nuts & Bolts Webinar

Sign-in begins at 7:30 am.

Each day includes a one-hour lunch break, as well as a morning and afternoon break of 15 minutes each. The order of lectures presented and break times may vary according to speaker preference.
