## Speaker

### Mary MacKrell, MSN, MEd, RN, OCN, BMTCN

Mary is an accomplished oncology clinical nurse leader and educator with 34 years of experience. She has participated in major changes in nursing and has actively contributed to the growth of the oncology nursing practice.

*For complete biography, please visit [MedEdSeminars.net](http://MedEdSeminars.net)  
MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

## Course Overview

This three-day course is designed for oncology nurses seeking a general oncology review in preparation for the ONCC® OCN Exam and BMT oncology nurses seeking a review in preparation for the ONCC® Blood & Marrow Transplant Certified Nurse (BMTCN®) Exam. The first two days will focus on the following categories from the 2016 OCN blueprint: cancer epidemiology, health promotion and cancer screening, scientific basis for practice, treatment modalities, symptom management, psychosocial care, oncologic emergencies, palliative/end-of-life care and survivorship. This is not meant to be an introductory course, but rather a comprehensive review of basic oncology nursing practice. The third day will focus on the following categories from the BMTCN® 2016 test content outline: indications for transplantation, types of transplants and stem-cell sources, pretransplant care, preparative regimens, stem-cell infusion, graft-versus host disease, post-transplant care, survivorship and professional practice. This is not an introductory course to BMT, but rather a comprehensive review of BMT oncology nursing practice.

### Program Learning Outcomes

This program prepares the learner to:

- Discuss and practice test-taking skills and strategies.
- Review the assessment and diagnostic findings associated with oncology conditions and diagnoses.
- Identify the nurse's role in the management and care of patients across the cancer trajectory.
- Discuss the clinical presentation and evidence-based intervention of common oncologic emergencies.
- Identify models of survivorship in oncology practice.
- Review the basic concepts for pre- and post-transplantation.
- Identify the nurse's role in the management and care of BMT patients across the transplant trajectory.
- Discuss the clinical presentation and evidence-based interventions of common issues in BMT.
- Identify key survivorship issues in BMT and professional oncology practice.
