MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

## Course Overview

The Nurse Executive Exam Cram (Basic) is designed to provide an overview of those subjects that are included in the ANCC certification exam. Subjects covered include: professional practice, with focus on nursing theory, research, quality improvement, process improvement, change theory and ethics. Healthcare economics is reviewed, as well as the healthcare environment. Lastly, delivery of care including: regulatory, process outcome, Magnet recognition, benchmarking, charts and graphs are described. The course is a fast-paced, intense presentation, and review of the exam blueprint along with preliminary study is recommended prior to attending. After attending, participants are encouraged to create a study plan individualized to meet their needs to successfully pass this exam.

### Eligibility

Who is eligible to take this exam? All requirements must be completed prior to application for the examination.

- Hold a current, active RN license in a state or territory of the United States or the professional, legally recognized equivalent in another country.
- Hold a baccalaureate or higher degree in nursing.
- Held an administrative position at the nurse executive level OR a faculty position teaching graduate students nursing administration OR a nursing management or executive consultation position for at least 24 months full-time equivalent in the last five years.
- Completed 30 hours of continuing education in nursing administration within the last three years. This requirement is waived if you have a master's degree in nursing administration.

## Course Overview cont.

### Program Learning Outcomes

This program prepares the learner to:

- Describe the Nurse Executive Exam (Basic), test plans and the practice requirements to sit for the exam.
- Develop a study plan for the exam based on understanding the blueprint and domains of practice covered.
- Identify common mistakes and pitfalls that are made during studying and testing for the exam.
- Review the core components covered in the exam through didactic supplementation and test questions.
