Speaker

Pat Clutter, MEd, RN, CEN, FAEN

Pat has been a registered nurse for 39 years and has spent over 37 of those years in the practice of emergency nursing. Her experience includes over 24 years in a Level I Trauma Center, as well as positions in a school of nursing, a continuing education department of a large hospital and a local college. She has maintained her CEN since 1980, when the testing was first offered.

*For complete biography, please visit MedEdSeminars.net
MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

Course Overview

This course is a review of emergency nursing designed to assist the participant in successfully obtaining CEN certification. The course offers lectures, graphics, videos and practice questions in many of the areas that are tested on the CEN Exam. This review will provide not only a knowledge base for successfully completing the exam, but also a foundation for further study as the participant works towards emergency nursing certification.

Why Be Certified

Successfully completing the Certified Emergency Nurse (CEN) Exam is a challenge that has been completed by only a minority of emergency nurses. Successful completion of this exam exhibits to others that the bearer has demonstrated a knowledge base in the specialty of emergency nursing that exceeds his or her peers.

Program Learning Outcomes

This program prepares the learner to:

- Discuss priorities of the primary and secondary assessment of patients in presenting to the emergency department.
- Describe basic principles of disaster management.
- Analyze the effectiveness of patient or family education in a clinical scenario.
- Discuss the basic principles of safe interfacility transfer.
- Describe anticipated assessment findings of patients with selected respiratory, medical, cardiovascular, neurologic, toxicologic, gastrointestinal and genitourinary emergencies.
- Plan and prioritize interventions of patients with selected respiratory, medical, cardiovascular, neurologic, toxicologic, orthopedic, psychiatric or gastrointestinal emergencies.
- Select appropriate triage categories for patients in clinical scenarios.
- Differentiate cardiogenic, hypovolemic and distributive shock with regards to assessment and management.
