If your profession is not listed, we suggest contacting your board to determine your continuing education requirements and ask about reciprocal approval. Many boards will approve this seminar based on the accreditation of the boards listed here.

## Speaker

### Mary MacKrell, MSN, MEd, RN, OCN, BMTCN

Mary is an accomplished oncology clinical nurse leader and educator with 34 years of experience. She has participated in major changes in nursing and has actively contributed to the growth of the oncology nursing practice. Currently, Mary is an oncology clinical nurse educator working at a large healthcare system in south Florida. She is responsible for the professional development of oncology nurses, assisting them in transforming the care at the bedside through education and practice. She has designed and presented oncology orientations and OCN® review courses, including the ONS chemotherapy biotherapy certificate course.

Mary is involved in the guidance of nursing practice in a busy oncology, blood and marrow transplant unit, assisting the bedside nurse in providing patient and family-centered care. She is an energetic educator who is able to present advanced concepts in an interesting and memorable manner.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.*

## Course Overview

This program is designed for oncology nurses seeking a general oncology review in preparation for the ONCC® OCN Exam. We will focus on the following categories from the 2018 OCN blueprint: cancer continuum, oncology nursing practice, cancer treatment modalities, symptom management, palliative care, oncologic emergencies and psychosocial dimensions of care. This is not meant to be an introductory course, but rather a comprehensive review of basic oncology nursing practice.

### Program Learning Outcomes

This program prepares the learner to:

- Demonstrate preparedness to challenge the OCN Exam.
- Identify personal learning gaps requiring attention prior to challenging the OCN Exam.
- Discuss and practice test-taking skills and strategies.
- Review the assessment and diagnostic findings associated with oncology conditions and diagnoses.
- Identify the nurse's role in the management and care of patients across the cancer trajectory.
- Discuss the clinical presentation and evidence-based intervention of common oncologic emergencies.
- Identify models of survivorship in oncology practice.
