Speaker

Erica R. Corcoran, MSN, RN, OCN, AOCNS

Erica has worked in the area of oncology nursing for 10 years, including focusing on bone marrow transplants, medical oncology, surgical oncology and palliative care. She has experience with the development and teaching of a number of courses, ranging from basic graduate nurse content, ONS® chemotherapy and biotherapy courses to professional certification courses. Erica maintains her OCN® and AOCNS® certifications through ONCC®, as well as her chemotherapy certificate from ONS.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.

Course Overview

This program is designed for oncology nurses seeking a general oncology review in preparation for the ONCC® OCN Exam. We will focus on the following categories from the 2018 OCN blueprint: cancer continuum, oncology nursing practice, cancer treatment modalities, symptom management, palliative care, oncologic emergencies and psychosocial dimensions of care. This is not meant to be an introductory course, but rather a comprehensive review of basic oncology nursing practice.

Program Learning Outcomes

This program prepares the learner to:

- Demonstrate preparedness to challenge the OCN Exam.
- Identify personal learning gaps requiring attention prior to challenging the OCN Exam.
- Discuss and practice test-taking skills and strategies
- Review the assessment and diagnostic findings associated with oncology conditions and diagnoses.
- Identify the nurse's role in the management and care of patients across the cancer trajectory.
- Discuss the clinical presentation and evidence-based intervention of common oncologic emergencies.
- Identify models of survivorship in oncology practice.
