Speaker

Melissa L. Weir, MS, BSN, RN, CEN, CPEN, CNE

With an MS with specialization in Community Health Nursing and Nursing Education, Melissa has been an ER Nurse since 1990, teaching in the clinical setting since 1992 and on a nursing faculty since 2003. Her background includes Home Health and Pediatric Med-Surg Nursing. Her area of professional concentration is nursing education—both clinical continuing education and academia, along with clinical expertise in Trauma and Pediatric Emergency Nursing. She is the clinical practice and education specialist in a pediatric emergency facility and is on the faculty of an RN associate degree program at a local school of nursing.

For complete biography, please visit MedEdSeminars.net. MED-ED reserves the right to substitute an equally qualified speaker if necessary.

Course Overview

This course is a review of emergency nursing designed to assist the participant in successfully obtaining CEN certification. The course offers lectures, graphics, videos and practice questions in many of the areas that are tested on the CEN Exam. This review will provide not only a knowledge base for successfully completing the exam, but also a foundation for further study as the participant works towards emergency nursing certification.

Program Learning Outcomes

This program prepares the learner to:

- Discuss priorities of the primary and secondary assessment of patients in presenting to the emergency department.
- Describe basic principles of disaster management.
- Analyze the effectiveness of patient or family education in a clinical scenario.
- Discuss the basic principles of safe interfacility transfer.
- Describe anticipated assessment findings of patients with selected respiratory, medical, cardiovascular, neurologic, toxicologic, gastrointestinal and genitourinary emergencies.
- Plan and prioritize interventions of patients with selected respiratory, medical, cardiovascular, neurologic, toxicologic, orthopedic, psychiatric or gastrointestinal emergencies.
- Select appropriate triage categories for patients in clinical scenarios.
- Differentiate cardiogenic, hypovolemic and distributive shock with regards to assessment and management.
